

**2001 Report  
Carlsbad Environmental Monitoring  
& Research Center**

*College of Engineering  
New Mexico State University*

Issued March 2002

1400 University Drive  
Carlsbad, NM 88220  
(505) 887-2759

## Table of Contents

Table of Contents .....	iii
List of Tables .....	iv
List of Figures .....	vi
Acronyms and Abbreviations.....	viii
FOREWORD .....	xi
OVERVIEW .....	1
Current Program Status .....	2
WIPP Environmental Monitoring Project.....	7
Management of CEMRC Redirection.....	11
Quality Assurance .....	12
WIPP ENVIRONMENTAL MONITORING DATA SUMMARIES .....	15
Meteorological Conditions in the Vicinity of the WIPP Site.....	16
Radionuclides and Inorganics in Ambient Aerosols .....	27
Radionuclides and Inorganics in WIPP Exhaust Air .....	45
Surface Soil Radionuclides and Inorganic Chemicals .....	56
Radionuclides and Inorganics in Surface Water and Sediments at Selected Reservoirs .....	66
Radionuclides and Inorganics in Selected Drinking Water Sources.....	84
Occurrence of Radionuclides in Residents of the Carlsbad, New Mexico Area.....	96
APPENDICES .....	101
REFERENCES.....	141
GLOSSARY.....	143

## List of Tables

Table 1. Listing of CEMRC Staff as of 31 December 2001 .....	6
Table 2. Key Monitoring Performance Indicators for the WIPP Environmental Monitoring Project in 2002.....	10
Table 3. Means for One-way ANOVA (LogBa) .....	33
Table 4. Means for One-way ANOVA (LogPb).....	33
Table 5. Maximum Trace Element Concentration for Baseline and Operational Aerosol Samples ...	34
Table 6. Summary Statistics for Gross Alpha/Beta Analyses of Daily FAS Filters.....	48
Table 7. An Intercomparison of Gross Beta Results following the Release of Fire Retardant Containing <sup>40</sup> K on January 9, 2001 .....	48
Table 8. Summary Statistics for Elemental Constituents in Weekly FAS Composites .....	49
Table 9. Results of Actinide Analyses for Quarterly FAS Composite Samples.....	51
Table 10. Summary Statistics for Inorganic Analytes in Soil Samples Collected in 2001.....	60
Table 11. Summary Statistics for Radionuclides in Soil Samples Collected in 2001 .....	61
Table 12. Range of Activity Concentrations for Uranium Isotopes in Surface Water Samples Collected from Three Regional Lakes during 1998 – 2001 .....	69
Table 13. Range of Activity Concentrations for Selected Radionuclides in Sediment Samples Collected from Three Regional Reservoirs during 1998 – 2001.....	70
Table 14. Range of Concentrations for Baseline Inorganic Constituents in Surface Water Samples Collected during 1999 – 2001 from Three Regional Reservoirs.....	72
Table 15. Range of Concentrations for Inorganic Constituents in Sediment Samples Collected during 1999 – 2001 from Three Regional Reservoirs .....	77
Table 16. Range of Concentrations of Selected Inorganic Analytes in Drinking Water Samples Collected from Carlsbad and Double Eagle during 1998-2001 .....	87
Table 17. Range of Concentrations of Selected Inorganic Analytes in Drinking Water Samples Collected from Hobbs and Loving during 1998-2001 .....	89
Table 18. Range of Concentrations of Selected Inorganic Analytes in Drinking Water Samples Collected Otis during 1998-2001 .....	91
Table 19. Demographic Characteristics of the "Lie Down and Be Counted" Population Sample through 1 October 2001.....	98
Table 20. "Lie Down and Be Counted" Results through 1 October 2001 .....	99
Table K1. Summary of Batch Quality Control Results for Drinking Water .....	118
Table K2. Summary of Batch Quality Control Results for Air Filters .....	120

Table K3. Summary of Batch Quality Control Results for Soils .....	122
Table K4. Summary of Batch Quality Control Results for Sediments .....	124
Table K5. Summary of Batch Quality Control Results for Surface Waters.....	126
Table K6. 2001 Method Detection Limits for Analyses by AAS .....	128
Table K7. Method Detection Limits for Analyses by Ion Chromatography.....	128
Table K8. 2001 Method Detection Limits for Analyses by ICP-MS .....	129
Table L1. Participation in Environmental Measurements Laboratory Quality Assurance Program.	134
Table L2. Participation in NIST Radiochemistry Intercomparison Program.....	135
Table L3. Results for Radioanalyses of Actinides in Blank Samples .....	136
Table L4. Laboratory Tracer Recovery Results for Radioanalyses of Actinides.....	138
Table L5. Results of Radioanalyses of Actinides in Replicate Soil Samples .....	139
Table L6. Ranges of Bias as Measured by Matrix Spikes in Radioanalyses of Actinides.....	140

## List of Figures

Figure 1. History of CEMRP Funding and Expenditures.....	5
Figure 2. Sampling Locations in the Vicinity of the WIPP .....	18
Figure 3. Annual Wind Roses for Near Field and Cactus Flats .....	19
Figure 4. Seasonal Wind Roses, Near Field .....	20
Figure 5. Seasonal Wind Roses, Cactus Flats.....	21
Figure 6. Monthly Mean, Minimum and Maximum Temperature at Near Field and Cactus Flats during December 1999 - November 2001 .....	22
Figure 7. Monthly Mean, Minimum and Maximum Relative Humidity at Near Field and Cactus Flats during December 1999 - November 2001 .....	23
Figure 8. Monthly Mean, Minimum and Maximum Barometric Pressure at Near Field and Cactus Flats during December 1999 - November 2001 .....	24
Figure 9. Monthly Total Solar Radiation at Near Field and Cactus Flats during December 1999 - November 2001 .....	25
Figure 10. Monthly Total UV-B Radiation at Near Field and Cactus Flats during December 1999 - November 2001 .....	25
Figure 11. Monthly Total Precipitation at Near Field and Cactus Flats during December 1999 - November 2001 .....	26
Figure 12. Mass and <sup>239,240</sup> Pu Activity Concentrations in Aerosol Samples Collected from February 1998 to August 2000. ....	40
Figure 13. <sup>239,240</sup> Pu Activity Concentrations versus Aerosol Mass for High-Volume Samples.....	41
Figure 14. Temporal Variations in Aluminum Concentrations in Total Suspended Particle Samples Collected during February 1998 to July 2000. ....	42
Figure 15. Relationship between <sup>239,240</sup> Pu vs. Aluminum Aerosol Samples from Cactus Flats, Near Field, and On Site Stations. ....	43
Figure 16. Percentages of Samples with Selected Elemental Concentrations above Detection Limits for Samples Collected from February 1998 to July 1999 (above) and February 1998 to July 2001 (below). ....	44
Figure 17. Alpha Emitting Radioactivity in FAS Samples Collected during December 1998 - July 2001.....	53
Figure 18. Beta Emitting Radioactivity in FAS Samples Collected during December 1998 - July 2001 .....	54
Figure 19. Sodium Released as Aerosols in the Exhaust from the WIPP.....	55

Figure 20. Mean Concentrations of Inorganic Analytes in Soil Samples from Near Field Grid Collected during 1998 – 2001 .....	62
Figure 21. Mean Concentrations of Inorganic Analytes in Soil Samples from Cactus Flats Grid Collected during 1998 - 2001 .....	63
Figure 22. Mean Concentrations of Radionuclides in Soil Samples from Near Field Grid Collected during 1998 – 2001 .....	64
Figure 23. Mean Concentrations of Radionuclides in Soil Samples from Cactus Flats Grid Collected during 1998 – 2001 .....	65
Figure 24. Surface Water and Sediment Sampling Locations at Brantley Lake .....	81
Figure 25. Surface Water and Sediment Sampling Locations at Red Bluff Reservoir .....	82
Figure 26. Surface Water and Sediment Sampling Locations at Lake Carlsbad.....	83
Figure 27. Activity Concentrations of Uranium Isotopes in Drinking Water Samples Collected at Carlsbad and Double Eagle during 1998-2001 .....	93
Figure 28. Activity Concentrations of Uranium Isotopes in Drinking Water Samples Collected at Hobbs and Loving during 1998-2001 .....	94
Figure 29. Activity Concentrations of Uranium Isotopes in Drinking Water Samples Collected at Otis during 1998-2001.....	95

## Acronyms and Abbreviations

μBq	microBecquerel
μm	micrometer
AA, AAS	atomic absorption, atomic absorption spectrometry
Ag	silver
Al	aluminum
Am	americium
As	arsenic
ASTM	American Society for Testing and Materials
Ba	barium
Be	beryllium
Bq	Becquerel
C	centigrade
Ca	calcium
Cd	cadmium
Ce	cerium
CEMRC	Carlsbad Environmental Monitoring & Research Center
CEMRP	Carlsbad Environmental Monitoring and Research Program
CFR	Code of Federal Regulations
Ci	Curie
CLP	Contract Laboratory Program
cm	centimeter
Cm	curium
Co	cobalt
Cr	chromium
CRDL	Contract Required Detection Limit
CRM	certified reference materials
Cs	cesium
Cu	copper
DL	detection limit
DOE	U.S. Department of Energy
Dy	dysprosium
EM	Environmental Monitoring
EML	Environmental Monitoring Laboratory
EPA	U.S. Environmental Protection Agency
Er	erbium
ERA	Environmental Research Associates
Eu	europium
F	fluoride
Fe	iron
FY	fiscal year
g	gram
Gd	gadolinium
Ge	germanium
GPS	global positioning satellite
HCl	hydrochloric acid
HClO <sub>4</sub>	perchloric acid
HF	hydrofluoric acid

Hg	mercury
HNO <sub>3</sub>	nitric acid
H <sub>2</sub> O <sub>2</sub>	hydrogen peroxide
hr	hour
IC	ion chromatography
ICP-MS	inductively coupled plasma-mass spectrometry
K	potassium
km	kilometer
L	liter
La	lanthanum
LaF <sub>3</sub>	lanthanum fluoride
lb	pound
LDBC	"Lie Down and Be Counted"
LFB	Laboratory Fortified Blank
LFM	Laboratory Fortified Matrix
Li	lithium
LRB	Laboratory Reagent Blanks
m	meter
mb	millibar
MBL	mobile bioassay laboratory
mBq	milliBecquerel
MDC	minimum detectable concentration
Mg	magnesium
min	minute
MJ	megajoule
mL	milliliter
mm	millimeter
Mn	manganese
Mo	molybdenum
Na	sodium
NaOH	sodium hydroxide
Nd	neodymium
Ni	nickel
NIST	National Institute of Standards and Technology
nm	nanometer
NMSU	New Mexico State University
Np	neptunium
ORNL	Oak Ridge National Laboratory
p	probability
Pa	protactinium
Pb	lead
pH	scale indicating acidity or alkalinity of a substance
PM <sub>10</sub>	particulate matter smaller than 10 micrometers in aerodynamic diameter
PM <sub>2.5</sub>	particulate matter smaller than 2.5 micrometers in aerodynamic diameter
Pr	praseodymium
PRB	Program Review Board
Pu	plutonium
QA	quality assurance
QAP	quality assurance program
QC	quality control

RIP	Radiochemistry Intercomparison Program
Ru	ruthenium
SAB	Science Advisory Board
Sb	antimony
Sc	scandium
SD	standard deviation
Se	selenium
SE	standard error
sec	second
Sm	samarium
Sn	tin
Sr	strontium
$T_{1/2}$	half-life
Th	thorium
Ti	titanium
TIMS	thermal ionization mass spectrometry
Tl	thallium
TSP	total suspended particulates
U	uranium
UVB	Ultra-Violet B
V	vanadium
W	watt
WERC	Waste-management Education & Research Consortium
WID	Waste Isolation Division
WIPP	Waste Isolation Pilot Plant
WTS	Westinghouse TRU Solutions

## FOREWORD

This report was written, edited and produced collaboratively by the staff of the Carlsbad Environmental Monitoring & Research Center (CEMRC), who are hereby acknowledged for their contributions to the report and the project activities described herein. The first section is an overview of the current program activities, structure, resources and quality assurance. The second section consists of data summaries containing methods and descriptions of results of studies in the WIPP Environmental Monitoring project. Tables presenting data from the WIPP Environmental Monitoring Project, and the contents of this report are available for electronic access at <http://www.cemrc.org>.

Production of this report is supported as part of the Carlsbad Environmental Monitoring and Research Program, a grant from the U. S. Department of Energy to New Mexico State University (DE-FG04-91AL74167). The issuance of this report and other publications fulfills a major objective in CEMRC's mission of making the results of CEMRC research available for public access.

The cover photograph shows an environmental chemist using an inductively coupled plasma-mass spectrometry (ICP-MS) system for trace element studies.
